Q no 2

Input:
n = upper limit
Output:
List of amicable pairs (220, 284)
Total pairs count -
Pseudocode:

```
function sumDivisors(n):
    If n <= 1 then return 0
    sum = 0
    for i = 1 TO n/2
     if n % i == 0 then
        sum = sum + i
     End if
End for
Return sum.
End function
Begin Main
 input n
 count = 0
Print "Amicable pairs upto ", n,
 for a = 2 to n-1.
      b = sumDivisors(a)
if b > a AND b < n AND b != a then
 if sumDivisors(b) == a then.
    Print("a", a, "b")
  count ++
end if
End for.
```

Date:

```
if count == 0 then
  Print "NO amicable pairs found upto", n
Else
  Print "Total pairs", count
End if
End main.
```

~~Qno:3~~ Part B

| i | (a) divide 220? | running |
|---|---|---|
| 1 | Yes | 1 |
| 2 | Yes | 3 |
| 4 | Yes | 7 |
| 5 | Yes | 12 |
| 10 | Yes | 22 |
| 11 | Yes | 33 |
| 20 | Yes | 53 |
| 22 | Yes | 75 |
| 44 | Yes | 119 |
| 55 | Yes | 174 |
| 110 | Yes | 284 |
